Nick-

I returned to the Conroe site this afternoon to check on progress. I spoke with Hulett Evans with SOS Environmental, the insurance appointed contractor. The contractors did return the soil roll-offs to the site and they are closed and secured. They have been working to drain the retention pond, but it still had water in it. They have pumped 5 frac tanks full, approximately 500 barrels each, and have one more to continue filling. Hulett indicated they should be done pumping this evening. I asked him to send pictures once that is complete.

Please let me know if you need anything else.

Jeff-

I made this table for Nick to use in the field. I don't have his email address, but would you send it to him or make it prettier and send it to him.
